

## POST Format for Successful/Failed Transaction on Webhook URL

PayUMoney will POST the following parameters of a transaction upon a success or Failure transaction event for the merchant.

Key	Description
<b>paymentId</b>	PayUMoney Payment Id
<b>merchantTransactionId</b>	Transaction Reference Id
<b>Amount</b>	Amount of the transaction
<b>Status</b>	Status of the transaction (Success/ Release Payment/ Failed)
<b>paymentMode</b>	CC/DC/NB/Cashcard/Wallet
<b>customerEmail</b>	Email of customer
<b>customerPhone</b>	Phone of customer
<b>customerName</b>	Name of customer
<b>udf1</b>	If merchant had passed anything in this field, else null
<b>udf2</b>	If merchant had passed anything in this field, else null
<b>udf3</b>	If merchant had passed anything in this field, else null
<b>udf4</b>	If merchant had passed anything in this field, else null
<b>udf5</b>	If merchant had passed anything in this field, else null
<b>productInfo</b>	productInfo of the payment
<b>additionalCharges</b>	If any Conv Fee was charged from the Customer for the payment, the Amount of the Conv fee Charged
<b>split_info</b>	Payment identifiers and payment parts in JSON (in case of split/aggregator transactions)
<b>error_message</b>	The reason of failure in case of a failed transaction
<b>notificationId</b>	Webhook Event notification ID
<b>hash</b>	Return hash (Post Transaction) as explained in the integration Document.

The data will be sent as a POST request to the webhook URL defined by the merchant. The parameters will be posted in JSON format.
